DETAILED ACTION

Status of The Claims

Claims 1-10 are currently under Examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 is rejected under 35 U.S.C. 102(b) as being anticipated by:

- Subbarao et al WO 00/48983 or
- Balasubramanyam et al, US patent 6160172 or 6395296.

As acknowledged by Applicants on page 2, second paragraph of the instant specification, Subbarao and Balasubramanyam disclose that hydroxycitric acid occurs in the Garcinia species fruits and that the said fruits “has received worldwide attention as a nutraceutical for effective obesity control”. Subbarao discloses double salts of Group IA and IIA of hydroxycitric acid in

order to produce food supplement in various formulations and beverages,
see page 1 or each reference.

Allowable Subject Matter

No prior art disclosing or suggesting the method disclosed in claim 1-9 was found. The closest art was found in Subbarao et al, WO 00/48983 or Balasubramanyam et al, US patent 6160172 or 6395296. The said patents disclosed method for preparing double salts of hydroxycitric acid from Garcinia species. However, none of the said methods requires the pH adjustment of a solution used in the method by adding an extract of purified Garcinia fruit extract in order to produce the said double salt.
